Professional Summary

Business development professional with a Master in Applied Mathematics and strong technical comprehension for solution-based sales. Experienced in translating product logic into business value, using a data-driven approach to build structured pipelines, pricing models, CRM workflows, and repeatable international growth processes.

Work Experience

International Sales and Business Development 2025.06 – Present

- Managed 8+ overseas markets with structured opportunity tracking, partner development, and demand qualification.
- Built a structured distributor pipeline and prioritized accounts based on market fit, conversion potential, and channel capability.
- Conducted solution-based discussions by aligning customer needs with product capability, deployment logic, and commercial feasibility.
- Designed pricing models to support partner negotiation, market entry, and long-term account development under different cooperation terms.
- Converted trial opportunities into repeat orders through close follow-up, usage-based feedback, and structured account support.
- Built a CRM system independently to standardize lead management, customer records, sales tracking, and follow-up visibility.

Technical Strength

- Strong analytical capability
- Ability to translate technical solutions into business value
- Structured sales methodology

Research & Analytical Background

Research Assistant, Key Laboratory of Complex System Optimization and Big Data Processing 2023 – 2024

- Participated in a national research project focused on rough set theory, statistical analysis, and feature selection methods.
- Cleaned datasets, reproduced advanced algorithms, compared model outputs, and delivered data reports for decision support.
- Co-authored research papers in applied data analysis and uncertainty measurement, strengthening technical depth and structured thinking.

Education

Master in Applied Mathematics Guangxi University, 2022 – 2025
Bachelor in Human Resource Management South China Normal University, 2016 – 2020

Tools & Communication

- Python, Excel, and SPSS for data analysis, reporting, and opportunity evaluation
- AI-assisted independent CRM development and process-oriented sales management
- English business and technical communication for overseas distributors, hospitals, and laboratory customers

Additional Information

- Fluent in English business communication
- US B1/B2 10-year visa holder
- Overseas exhibition experience in 7 countries
