Professional Summary

International sales professional with hands-on experience in emerging markets, distributor network expansion, and infrastructure-driven demand development. Strong understanding of system-based equipment sales, cooperation model design, pricing strategy, payment risk control, and data-backed commercial decision-making across cross-border B2B markets.

Work Experience

International Sales and Market Development 2025.06 – Present

- Developed 8+ emerging markets and identified infrastructure-driven equipment demand opportunities through market screening and channel mapping.
- Built 40+ distributor pipelines and advanced qualified partners through structured follow-up, background review, and capability assessment.
- Converted pilot orders into commercial opportunities through product positioning, local market adaptation, and solution explanation.
- Designed cooperation models aligned with territory maturity, account potential, and channel capability under exclusive, non-exclusive, and credit-based scenarios.
- Managed pricing frameworks across multiple markets by comparing deal structures, target volumes, and local affordability while protecting margin.
- Participated in overseas exhibitions and customer meetings in 7 countries to accelerate market entry, distributor trust, and lead conversion.
- Controlled payment risk through partner screening, deal structure review, account evaluation, and collection awareness.

Renewable Energy Relevance

- Infrastructure-driven demand understanding
- Equipment + consumable sales logic
- Territory development capability

Analytical Background

Research Assistant, Key Laboratory of Complex System Optimization and Big Data Processing 2023 – 2024

- Participated in a national research project involving rough set theory, statistical analysis, and feature selection.
- Cleaned raw data, reproduced comparative algorithms, and generated structured reports to support research decisions.
- Built strong capability in understanding complex systems, evaluating uncertainty, and turning data into practical judgment.

Education

Master in Applied Mathematics Guangxi University, 2022 – 2025
Bachelor in Human Resource Management South China Normal University, 2016 – 2020

Tools & Strengths

- Excel, SPSS, and Python for market research, pricing analysis, and structured reporting
- Independent CRM system building with AI-assisted development for lead and account management
- English technical and business communication with overseas distributors and end customers

Additional Information

- Fluent in English business communication
- US B1/B2 10-year visa holder
- Overseas exhibition experience in 7 countries
- Valid C1 driver's license
- Open to long-term overseas assignment
